Web Development & Design

ABOUT ME

I'm an experienced jack of all trades when it comes to the web. I have a solid background in web & graphic design, web development, application support, data troubleshooting, & website configuration.

While I'm grateful to have this diverse work history, I'm working towards specializing more & growing my technical knowledge. Lately I'm gravitating towards web development with PHP, JavaScript, SQL, & APIs. In my off-hours, I've been enjoying learning more about these by building my new portfolio, and am currently enrolled in a web development bootcamp with UC Davis.

RECENT WORK EXPERIENCE
